How do I figure out which car is right for me?

This depends on where you're travelling, how many people are travelling and the style of driving you intend to do. Cars range from small (economy, compact) to larger size cars (intermediate, full size), to 4WD's, convertibles and luxury vehicles. For short trips with fewer passengers opt for the smaller cars; for longer trips with the family then a larger car, van or SUV would suit. There are plenty of car rental options to choose from depending on your needs. You can use the ACRISS system detailed above to find the car that suits your needs. This is an internationally recognised code that will ensure that you get the same standard of vehicle wherever you rent.

Automatic and Manual Transmissions

Automatic and manual vehicles are available in Australia and are generally similar in price to rent, so choose the one you feel most comfortable driving.

Do I Need a Credit Card?

Yes. A credit card will be needed for a deposit when collecting your vehicle. The deposit is generally the insurance excess of the rental car which can vary between \$385 and \$3,500 (+tax) depending on the category of vehicle you have booked and the rate type.

Collecting at an Airport in Australia

At most Australian airports, rental companies will have a desk in the arrivals hall and vehicles will be located within walking distance. However, at smaller airports you may be required to collect your vehicle from a downtown depot. In this case, a courtesy transfer will usually be provided from the airport to the depot. Auto Europe offer all-inclusive prices which generally include any location/airport fees and charges that may otherwise apply. Remember to check at time of booking to ensure your rental will include all airport fees.

Driving Off-Road

In most cases, car rental suppliers will not permit travel on un-sealed roads or off-road unless it is reasonably unavoidable. This will also include driving through rivers, streams or beaches and in some cases above the snow line in the Australian ski fields. You will not be covered by insurance if you do drive in these conditions, so check with Auto Europe when you book to ensure exactly where you can drive.

Rental Vehicle Insurance

Australian law requires all vehicles to have Compulsory Third Party (CTP) insurance, although your car rental supplier should already have comprehensive insurance covering their cars. Any accident must be reported to the insurance provider immediately and an excess will be due.

Car rental companies in Australia will normally include:

- **Third Party Insurance and Compulsory Insurance:** This will be included in your car hire price. This covers you for other peoples' injury and vehicle damage.
- **Theft and Loss Cover:** This limits your financial liability for the loss or theft of the rented vehicle and is generally included in the prepaid car rental price.
- **Fire and Liability:** Limits your financial liability for bodily injury or death and is normally included in the pre-paid car hire price.
- **Personal Accident Insurance:** This covers the driver for personal injuries and is generally not included in your car rental rate. It is considered an optional extra that you can take out upon collection of the car.
- **Collision Damage Waiver (CDW):** This limits your financial liability for damage to the rented vehicle and is normally included in pre-paid car hire prices. Rentals are normally subject to liability excess, which can be reduced at the time you collect your rental car.

Parking Laws

There are various types of free and paid parking options within Australia. In the larger cities parking can be costly and incur time limits. As signage, rates and time limits vary between states, it is important to check your options before planning to drive in one of the main cities.

Licence Requirements

When renting a vehicle in Australia, a driver will generally need to have held a full licence for a minimum of one year. Some suppliers may make exceptions, however fees may apply.

Min & Max Age Requirements

The minimum age for drivers renting a car in Australia does vary, though most suppliers require a minimum age of 21. It is important to check this information when booking your rental car, as a young driver's surcharge may apply to those under the age of 24. This charge generally ranges from AU\$20 - \$30 per day. Some suppliers do have a maximum age limit also, so drivers aged over 75 should enquire with Auto Europe when booking.

Wildlife

Diverse wildlife is found throughout Australia, including the outskirts of major cities. As such, extra caution should be taken when driving on rural roads. Take care in areas that aren't built up, particularly around dawn, dusk and night-time. Kangaroos, wombats and koalas frequently venture onto roads and can cause accidents.

Road Tolls and E-tags

Whilst the vast majority of roads in Australia feature no tolls or fees there are some – particularly on bridges, freeways and tunnels – which do charge drivers for their use. These roads are mainly found in Sydney, Melbourne and Brisbane. Most have now switched to electronic tolling, where an electronic tag (also called an E-Tag) is attached to the vehicle and is picked up by sensors along the route. If you are planning to drive in major cities, please enquire about these tolls with the rental company before you set off.

Perth to Margaret River

Drive 270km south of Perth to the town of Margaret River and the surrounding area, celebrated for its award winning wine production. There are over 130 wineries here, producing one fifth of Australia's wine. The drive will take you along the impressive south stretch of WA's east coast, passing through the towns of Mandurah, Bunbury and Busselton.

When in the Margaret River region, there are smaller towns and resorts which offer hidden surprises for travellers. You can get up close with sting rays in the still waters of Hamelin Bay, just don't pat them! Head up the coast and you will find a hot spot in Dunsborough, where the population swells with relaxed holidaymakers in the summer months. It is easy to cruise around different wineries, breweries and artisan producers without a guide. There are plenty of attractions for the driver too, from sweeping scenic views and delectable local dishes to live entertainment and outdoor games!

Broome to Exmouth - The Pilbara Coast

This is a drive that should be taken over at least a couple of days, as it is almost 1400km in total, however this will cover some of the best parts of Australia's west coast. Begin in Broome, where you will see the dazzling white sand and aqua waters of Cable Beach, visit Roebuck Bay to see how pearls are formed and harvested.

Follow the Great Northern Highway south along the coast on Eighty Mile Beach to Port Hedland, where iron ore mining is the predominant industry, then onto Karratha. From here you can explore the heritage town of Cossack and the magnificent Millstream-Chichester National Park while you learn of the local aboriginal rock art and culture. Drive along the Northwest Coastal Highway until you reach the turnoff to Exmouth on Burkett Road. Exmouth is the gateway to the magical Ningaloo Reef, where visitors can swim with whale sharks or snorkel in aquamarine waters with tropical fish.

Nothern Territory

Covering the central northern part of the country, the Northern Territory can be described as remote, wild, breathtaking and untouched. With amazing natural attractions and landscapes appearing just as they would have millions of years ago, the Northern Territory is the place where travellers can truly enjoy the vastness of the Australian outback.

Attractions

Darwin - Darwin is by far the largest city in the state, and also the only one found on the coastline. One of the most cosmopolitan cities in Australia, over 50 different nationalities are represented in Darwin. Be sure to visit the Mindil, Nightcliff and Parap markets.

The Red Centre & Uluru - Rich in aboriginal culture, visit the natural monuments of Ayers Rock (Uluru), Mount Olga, the Macdonald Ranges and Kings Canyon. Alice Springs, one of the most remote communities in the country, was settled around a waterhole in the middle of vast deserts and makes a great centre to base exploration of this region.

Kakadu & Litchfield National Parks - Experience amazing scenery and rich wildlife, as well as deep rooted Aboriginal culture. Take a boat trip on the Yellow Water, a billabong teeming with wildlife, and witness Aboriginal rock art dating back 40,000 years.

heading out in a leisurely pace and stopping off along the way to see the sights is definitely recommended. The historic town of Humpty Doo, just a short distance from Darwin, and Fogg Dam Conservation Reserve are both worth a visit.

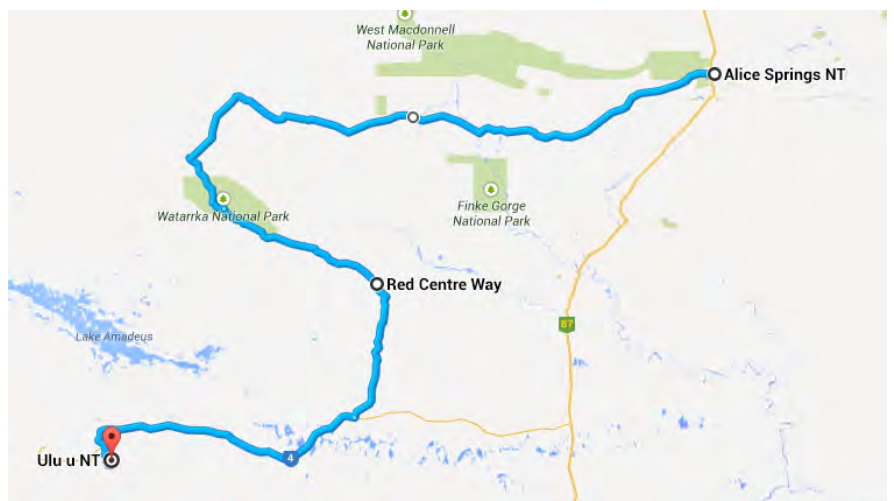

Once you reach Kakadu, you will have the chance to see amazing scenery and wildlife unlike anywhere else in the world. The largest National Park in Australia, Kakadu covers a huge area, offering endless opportunities to explore. From wetlands and rugged coastlines to huge valleys and gorges, kakadu has it all!

Alice Springs to Kings Canyon and Uluru

Although not a short drive, the trip from Alice Springs to Kings Canyon and Uluru winds through some outback areas with remarkable scenery. Heading southwest from Alice Springs, it will take about four hours to reach Kings Canyon in Watarrka National Park, where you'll find spectacular views and great walking trails leading to ancient rock paintings. Once you have explored the canyon, you can either spend the night at a nearby camping ground or resort, or

continue on to Uluru, which is roughly another four hours from here. Uluru itself is a breathtaking site, standing at almost 350m tall and often appearing to change colour. For the best viewing times, aim to be here around sunrise or sunset when the colours of the rock are most vivid.
